

Niagara Operations and Programming

Target Group

This course is designed for those who have or are interested in adding the Niagara graphic user interface.

Prerequisites

To attend this course some coursework or practical work with an Invensys BAS is strongly recommended. Practical experience with computers, working with HVAC, and exposure to building automation would be advantageous.

Description

This course discusses the range of Niagara features from sign-on to program backup. It includes general information about interfacing with the NW8000 / DMS / LON / BACnet panels, use and creation of graphic screens, controller programming interface, and setup of web pages and reports.

Representative Topics

- Workplace Pro Engineering Tool
- Realtime Display
- Alarm Handling
- Block, Point and Workplace editing
- Overrides
- Graphic Development
- Point Logging
- Data Trending

Duration of the Course

4.5 days
