

## **NW8000 – Application Specific Devices and Personal System Interface Program**

### **Target Group**

This course is designed for those knowledgeable on the operation of ASD controllers but require programming experience.

### **Prerequisites**

To attend this course practical operational experience with NW8000 GCM and some practical experience with ASD devices is required.

### **Description**

This course provides information and practice on programming ASD devices such as the MicroZone 2, Microflo2, Package Equipment Module, and Lighting Interface Module. Programming tools such as Terminal Emulation Program, Personal System Interface, and Extended PSI will be discussed.

### **Representative Topics**

- Block programming for the devices
- Interface to the Parent Area Controller (GCM)
- Sharing of information between ASD's

### **Duration of the Course**

4.5 days
